Following HAP purification, this DNA was used as tracer in a subtractive hybridization reaction. The driver was PCR amplified cDNAs from pools of 5,000 clones made from the same 5 libraries. The pools of 5,000 clones made from the same 5 libraries. The pools consisted of the following libraries and clonelDs: Soares NbHF pool 1: 1309384-310919, 323208-335895 Soares NbHF pool 1: 145032-147335, 14720-148103, 118872-14925, 15002-150407, 151176-152327 Soares NbHFF-9W pool 1: 738280-7305311, 320136-332823, 336280-325653 Soares NbHFF pool 1: 732720-726407, 739080-740999 Subtraction by Bento Soares and M = Pating Novaldo.

Equal amounts of plasmid DNA from five normalized
Ilibraries were mixed, and as circles were made in vitro.
Following HAP purification, this DNA was used as tracer in
a subtractive hybridization reaction. The driver was
PCR amplified cDNAs from pools of 5,000 clones made from
the same 5 libraries. The pools consisted of the following
libraries and cloneries: Soares where pool 1:
1039384-310319, 323208-325895 Soares where pool 1:

Actual start of this clone is at base position 80354 of RP4-791C19; actual end is at base position 177998 of RP5-1091E12.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             SOURCE INFORMATION:
This clone was derived from human PAC library RPCI-5, prepared by Pleter de Jong and coworkers at the Roswell Park Cancer Institute (http://bacpac.med.buffalo.edu) using the method described by Ioannou et al., Nature Genetics 6:84-9 (1994). The library is from the companion of the companion of the library is from the library in the library is from the library in the library is from the library in the library in the library is from the library in t
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    The sequence of this clone was established as part of a mapping and sequencing collaboration between the NHGSI Chromosome 7 Mapping Project (Eric D. Green, Director), John D. McPherson in the Project (Eric D. Green, Director), John D. McPherson in the Department of Genetics (Washington University), and the Washington University Genome Sequencing Center.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               NOTICE: This sequence may not represent the entire insert of this clone. It may be shorter because we only sequence overlapping clone sections once, or longer because we provide a small overlap between neighboring data submissions.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                The clone RP5-1091E12 from base position 192688 to 192794 is an approximate representation of a tandem repeat. There are approximately 800 bases of this tandem missing according to the restriction digests: ecorRV band size real at 5047, insilico at 4288; hindili band size real at 10980, insilico at 10434; bamhi
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  one male donor.
The clowe may be obtained either from Genome Systems, Inc. (http://www.genomesystems.com) or Research Genetics, Inc. (http://www.resgen.com); or from Pieter de Jong.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              http://www.nhgri.nih.gov/DIR/GTB/CHR7 , send
